Board Votes Unanimously to Ban Smoking on School Grounds Starting July 1

by Kim Parker

A decision that will change the atmosphere of East Brunswick High School and the habits of its students perhaps more than any other in recent memory is the unanimous vote of the Board of Education to ban smoking on school grounds for the 1987-88 school year.

The three-step smoking policy was presented to the Board at a regular meeting on Thursday, April 30, by the newly appointed assistant principal, Ms. Petricek. The first phase of the policy will entail additional time in current health classes to discuss the hazards of smoking, posters on the effects of smoking placed at strategic locations throughout the school, and messages on the cafeteria display board discouraging students from smoking. Then a general faculty meeting will be held in late May to explain the administrative position and to ask for cooperation in implementing and enforcing the new rule. Finally, and what the administration feels is most valuable about the first phase, "The Great East Brunswick Smoke-Out" will occur on June 4, 1987. This will be a school-wide program where a film from the American Cancer Society will be presented to all health and physical education classes. Following the film, health teachers will distribute the new smoking policy for the 1987-88 school year and answer any questions that the students might have.

Phase Two will be a summer preparation for the upcoming change in procedure. A letter will be mailed home to all students and parents outlining the new policy on smoking and asking for maximum cooperation. This new school rule as all others will be included in the students handbook which is also mailed home during summer break. In-service training for teachers who will be instrumental in the disciplinary aspects of the policy will also be conducted.

Phase Three, the most controversial portion, will take effect upon commencement of the following school year. No smoking will be permitted anywhere on the school grounds. Enforcement will be comparable in intensity to any other school rule. If a student is seen by a teacher or teacher aid smoking anywhere on school property, disciplinary action will be taken. The punishment, however, will be a somewhat different approach, what Mr. Sheerin calls a "positive stance." For a first offense, students will have the option of an In-School-Suspension or attending five "smoke-enders" classes to be given at the high school, during the students lunch period. These classes, supervised by Mr. Balsemello, a certified "smoke-enders" instructor, will focus on helping young people break the habit. A second offense will require mandatory classes and/or other possible disciplinary action, and a third offense merits an Out-of-School suspension.

The decision of the Board was prompted by the conclusions of a Smoking Committee made up of smoking and non-smoking students and teachers that met and discussed the topic for seven months of last school year. The committee ultimately decided that since only ten percent of the student body smokes at the high school and that smoking has been proven to be deleterious to both smokers and non-smokers alike, smoking should be banned at EBHS. After submitting their resolution to the administration, it was decided that the issue would go to the Board for more careful scrutiny.

Principal James Sheerin and Superintendent Joseph Sweeny maintain that as an educational institution, the high school has a responsibility to protect the welfare of its students. "How

Colleges Accused of Bias Against Asians

by Diana Tsaliovich

With graduation in sight, most seniors look forward to attending the colleges of their choice. Some students, however, may not be pleased with where they are going. They have been rejected by some of the country's best universities, even though they feel that they are fully qualified. These students are Asian, and, Asian-American leaders claim, they are victims of discrimination.

"As soon as admissions of Asian-American students began reaching 10 or 12 percent...(their) admission has either stabilized or gone down," says Ling-Chi Wang, an assistant professor of Asian-American studies and a researcher at the University of California. Wang believes that colleges "look for ways of slowing down the admission of Asians." This is due to "a growing uneasiness that as a disproportionate number of Asians get admission to the system, they are creating an imbalance and there should be quotas," explains Henry Der, executive director of Chinese for Affirmative Action in San Francisco.

Such accusations are not unfounded. A faculty committee at Stanford University conducted a study of admission procedures there. Although the committee found no evidence of "implicit quotas or conscious discrimination" against Asians, it did note that the rate of acceptance of Asians was almost one-third less than that of Caucasians from 1982 to 1985. The committee suggested that Stanford admission procedures possibly contained "unconscious" bias. Consequently, Stanford said it was revising its admission policy to correct the discrimination.

Officials at other institutions, who wish to remain anonymous, oppose quotas, although they express concern over the influx of Asian students. Some officials argue that Asians' success could cause racial disharmony in college and in society in general. Others fear that an inordinate number of Asians threatens the existence of a diverse student body, especially in science and engineering departments.

Sciencest and math courses are usually very popular among Asian-Americans. Also, the students generally earn higher SAT scores in math. This is why Wang and other critics contend that Berkeley, in its attempt to increment the number of non-minority students, has changed its admission policy to favor subjective criteria such as extra-curricular activities and essays.

As far as Stanford and Berkeley are concerned, however, some EBHS students do not agree. Says one senior, "Stanford and Berkeley are not the problem. Berkeley is 25 percent Asian. However, I know at least four Asians (at EBHS) who were qualified but didn't get into Princeton and other good colleges." Another student adds that these same people **were** accepted to colleges of similar caliber.

The truth is difficult to uncover. Universities vehemently deny any accusations, but critics persist. The boundary between bias and selectiveness remains vague.

The Smoking Ban: Fair and Farce?

by Charles Cho

By banning smoking on school grounds, the Board of Education has sent a strong signal to the students and staff of East Brunswick High School. The signal is obvious: the board will not tolerate smoking because, as an educational institution, to allow smoking would be the same as condoning it. While the board is entitled to, even obliged to, encourage healthy habits by its students, it is not the place of the board to require that students quit smoking. The board is making a serious mistake that it should reconsider.

To be sure, the decision has many good and admirable qualities, for which the board should be commended. Considering the proven harmful effects of smoking, the schools should use their health education classes to inform their students about the dangers of smoking. The "smoke-enders" group would provide a valuable service to the students who wish to quit. These decisions, as Mr. Sheerin has stated, are indeed positive.

The board has decided to institute a total ban for two reasons. The first is the growing trend to ban smoking in public places. In many work places, theatres, restaurants, and other indoor public places, smoking is prohibited. The reason for the prohibition is the growing body of evidence that indicates that exposure to second hand smoke is as harmful to the non-smoker as smoking is to the smoker. The right of the smoker to smoke ends when the health of the public is endangered. The school already has such a ban in place; students are not allowed to smoke in the building. No community has, however, banned smoking in an outdoor public place. The Surgeon General has not conducted any conclusive studies that prove that smoking in the open air has serious effects on the non-smoker. Non-smokers are only exposed to the cigarette smoke for a few seconds during passing time.

The second reason for the ban is the supposed satisfaction of the student body. The actions taken are primarily based on the recommendations of last year's smoking committee. This committee, which held meetings after school over a six month period, was hardly a good representative of the student body. It was made up of only a handful of students; some meetings had as few as ten students. The meetings were announced in the Daily Bulletin, but they were not well attended by the smokers. Most of the students did not believe that a ban would ever be instituted. Announcements like, "Smoking will be banned. Express your views at the smoking committee meeting" were not run; instead, rather vague announcements were run instead. When the board finally did vote on the ban, not a single smoking rights spokesman was present. When the ban is begun, two thirds of the students affected will not have even been in this school when the committee's decision was made. In the world's greatest democracy, the students have virtually no control over their school. The student council primarily funds activities, but it does not have any policy making power. The liaison to the board does not have voting rights. The lack of student involvement alone makes the ban suspect.

Hence the board was acting on good premises, but both were actually false. The dangers of second hand smoke are not documented in the open air. Secondly, the movement to ban smoking is rooted in a committee of less than one percent of the student body.

The ban is terribly unfair to the smokers themselves. The smokers smoke because that is their personal choice. When they began smoking, it was perfectly legal; now that they are addicted to the nicotine, they are forced to quit immediately. They are treated as if they were criminals, although they have done nothing wrong. A student could be thrown out of school because he is having trouble kicking the habit, which millions of people have not been able to do. Even if a student is trying to quit through the "smoke enders" program, he/she could still be suspended before he/she is even finished with the week long course. The ruling is clearly an *ex post facto* law aimed at those who smoked in school before the ban. Although the ruling does not prohibit smoking at home, it effectively does force the smokers to quit because they would be unable to make it through a six hour day without a cigarette.

If the philosophy behind the ban is flawed, the logistics are worse. The ban is virtually unenforceable. The board and the administration have decided that the enforcement of this policy will be comparable to that of all the other school rules. The administration has made the conservative estimate that ten percent of the student body smokes. This figure may seem small, but this amounts to two hundred students. Teachers and aides will be forced to write up two hundred students and report them to the assistant principal's office. Who would be responsible for the extra paper work involved? How could one aide write up all of the smokers if they stand in groups of twenty to thirty?

The fact is that smokers will smoke, ban or no ban, on school grounds. An administration that does not realize this can only be labelled naive. Smoking will be driven underground. The bathrooms will certainly become a favorite haven for smokers. Will the aides, all of whom are female, patrol the boys' bathrooms? This action would be wasteful and ridiculous. The school system values teachers for what they do in the classroom; teachers should spend their time teaching, planning classes, or grading papers, not sitting in a bathroom watching out for smokers. If the smokers decide to sit in their cars and smoke, will the administration send aides and/or teachers out into the parking lots? Or the surrounding woods? The board has made an unenforceable rule. It could be enforced, but the board has not hired more aides, male aides, or extra staff to take care of the influx of new offenders. If the board hired the new staff, would the community be willing to pay the necessary money? Even if this were the case, surely our education dollars would be better spent on the building, new textbooks or salary increases for the teachers.

What the high school will witness is a new form of prohibition. Students will resent authority figures who punish them for an infraction which was not even a crime a year earlier. Disturbances like school walkouts or protests are also a possibility that the school system should consider.

It is true that no public school system should condone an activity that is harmful like smoking. Using the same argument, the school should not promote slogans like "Don't drink and drive" because it would "condone" underage drinking. What the board has failed to realize is that allowing smoking in limited areas outside is not equivalent to sanctioning. The purpose of an educational institution is to give its students the facts, and then let them make their own decisions as responsible adults. The ban is contrary to the principles of freedom of choice and individuality. Students will see teachers enforcing a rule that they themselves may not believe in. In the "Do as I say, not as I do" tradition, teachers who smoke in the faculty room will be forced to tell students not to, since they must enforce school rules. The message is a simple one. The board members should ask themselves if this is the kind of message they want to give to America's youth. The air may clear, but the problems won't.

by Julian Hsiang

Regardless of the popularity of the decision, the Board of Education of this or any other town has the power to implement and enforce a total smoking ban on school grounds for any student studying within the district. The Administration is legally bound as *in loco parentes,* that is, guardians during the period in which a student is on school grounds or in transit to and from school grounds. Any harm which befalls students while in or on their way to and from school is the responsibility of the Administration which can be sued for injuries sustained. The school district is not a microcosm of our society; therefore, we students do not have the rights of adult citizens in this society. The school has jurisdiction over our conduct as if we were its minor dependents (children under eighteen). That is why we and our persons can be searched by school authorities on a different standard that of most citizens in this country.

Through the Administration did not need to consult the student body at all in this matter, it chose to hold "smoking committee" meetings in an attempt to assess students' views. That few students who attended the meetings were smokers is neither the fault of the school itself nor of the non-smokers who chose to attend. The Board of Education rightly feels that any act which is as harmful to the self as smoking, drinking, or the use of controlled substances should not be allowed on school time; students who wish to participate in such activity can do so on their own time and off school property.

This ban, unfortunately, can not be applied to teachers in the district because they are employed by the school district and are independent citizens. To fail to provide teachers with an area to smoke would be a violation of their rights, even though many employers are attempting to do so nevertheless. The rights of teachers in their workplace and students in the school are not the same.

Any questions regarding enforcement of the new policy should have little or no bearing on the decision, especially since the implementation of the plan remains within the jurisdiction of the Administration. Smoking bans have already been instituted in John P. Stevens and West Windsor-Plainsboro. In addition, the "Smoke Enders" program into which a first-time offender may and a second time offender must enroll represents a service provided by the school for students, not a punishment. In-School Suspension and Out-of-School Suspension will be applied when needed for smoking as it has been for habitual tardiness and repeated truancy.

The dangers of smoking to both smokers and adjacent nonsmokers can not be contested. It is therefore the appropriate role of the Board of Education to stop this behavior on school time and on school grounds.

Smoking

(Continued from Page 1)

could we teach health education and then condone an activity that has conclusively been shown to be harmful?" states Mr. Sheerin. "We feel that by approaching this from a positive viewpoint and offering to help students who are addicted to smoking we will be encouraging better health and fitness and at the same time be discouraging students from starting to smoke."

The students have mixed views on the topic, although proponents of the policy are in the majority. "It's infringing upon the rights of the smokers," says Andrew Javorsky, a junior, "if they want to smoke and they do it outside then that is their choice." Darren Kimball, a senior, who has been an active voice in the anti-smoking crusade, is in staunch support of next year's plan. "Smoking is detrimental to everyone around, and the non-smokers right to breathe clean air supersedes the rights of the smoker," he says. But whatever the individual opinions on the subject, not one smoking student or smoker's rights advocate was in attendance at the Board meeting that had such a major impact on the lives of the East Brunswick High School students.

Don't Let The Senior Rush Get You Down

Despite the common epidemic known as "senioritis," any senior can tell you that senior year can be the most hectic and rushed year of high school. As soon as seniors get back from their sun-filled, laid back days of summer, a million deadlines are thrown at them. Applications have to be sent out, early decisions filed, and tests taken. In between this, seniors must somehow choose a college and maintain their high school grades as well.

Some good advice: Don't get caught in the rush. There are several things that juniors can do over the summer to alleviate the rush in the fall. Firstly, and most importantly, anyone who has not met with their guidance counselor for college planning should schedule an appointment. After discussing what you want in a college, the guidance counselor will compile a tentative list of colleges you might be interested in. The next step is to look up these colleges to see if their characteristics suit you. One good book of college listings is "The Comparative Guide to American Colleges." This and others like it can be found in the college/career center. Another good source is our school's college counselor, Mr. Lippincott, who has met with hundreds of college representatives and can give more insightful descriptions of the colleges.

After refining your list of schools, a good idea would be to contact these schools and have them send brochures. Request an application as well so you can have some extra time to think of how to fill it.

Once you have studied the brochures and have narrowed down your list to several schools that interest you, a good idea would be to schedule a campus visit. Your perceptions of a school beforehand may be very different from reality and you don't want to be shocked by the change during your freshman year. Colleges offer prospective students the opportunity to stay at the campus overnight (or over the weekend), visit classes and facilities, talk to teachers and students, and just "do" whatever the students are doing. For this reason it is a good idea to visit campus without your parents. It will give you a feel of what the school is really like. Some colleges even offer reduced airfare for your transportation.

Unfortunately, summer may not be the best time to visit the campus because many students are away. Paradoxically, fall is usually very busy at colleges and you may not have the opportunity to receive an interview if you did not schedule ahead. If transportation is not a problem, then definitely schedule a summer campus visit to get some idea of the college you might be attending.

While at the campus, request an official campus tour. It is usually conducted by students and as you view the college, you will see it through the eyes of someone who goes there, rather than someone who is trying to sell it to you. While visiting the campus, try to attend a freshman class to see if it is what you expected. Read the student's newspapers, bulletins, activity announcements. Find out about the sport facilities if you are an athlete. Attend a recreational activity, be it a football game, party, or play. The most important thing, though, is TALK to people. Find out if this is the place you would like to spend your next couple of years. After the campus visit, you should have a good idea of what college you want to attend. You can now devote the senior year to getting accepted rather than scrambling to find a place to go. Then you can enjoy your "senioritis" without hassles.

What Do You Think

by Julie Levinson and Shari Akresh

In the April 1987 issue, we asked 2 questions for our readers to respond to. We have listed the outstanding quotes as well as percentages. Do you think that smoking should be permitted on the grounds of EBHS?

Yes: 56%

"If they prohibit it, then people are just going to rebel the administrators."

"If smokers don't provoke any direct problems towards the school, then why should they be denied their right to smoke?"

"I feel smoking should be limited to certain areas of the school. This way less doorways will be crowded, and the non-smokers will be able to enjoy the fresh air."

No: 44%

"Smoking not only affects the student doing it, but others who inhale the smoky air."

"Smoking should be banned near doorways since it is a fire hazard to block them."

"Smoking is just as much a drug as marijuana or alcohol since it is addictive with unpleasant side effects."

Should the death penalty be used as a form of punishment for convicted criminals?

Yes: 61%

"If someone kills an innocent person, his life should be taken as well."

"One who kills another should not be allowed the opportunity to strike again."

"An eye for an eye, a tooth for a tooth!"

No: 39%

"There is no reason to believe that capital punishment will deter murder any more effectively than a life prison term."

"The death penalty cannot be useful because of the example of barbarity it gives to men."

"This nation should not legitimize murderous vengeance by making it a part of our system of justice."

Those Who "Say No"

by Julie Meyers

"Operation AWARE" and "Just say No!" clubs have been popping up all over the country in an effort to thwart drug abuse and implement drug education and awareness. In compliance with these efforts, the Junior Health curriculum allocates several weeks of class time to the subject of drug abuse. Along with group discussions, movies, and guest speakers, there are many tests and projects designed to increase drug knowledge. Even though this program was created with good intentions, it often seems to have the opposite effect.

Some of these problems arise after teacher-led discussions. The educators often assume, because of statistics, that the majority of their students have experimented with or regularly use drugs, alcohol, or both. They often make allusions to parties and concerts when discussing this particular topic. They tend to over-generalize and encompass all the students even though many don't use these chemical substances. They also throw out statistics such as the experimental and social usage from late grammar school to early Junior High. Those students who do not fit these "prototypes" feel uncomfortable. They begin to wonder if they are "square" or if perhaps they should start to experiment to "catch up" or to see "what everybody else is doing." Also, they are often called upon to participate in class discussions and relate some of their own experiences at parties. Their lack of experience embarrasses them and in order not to be laughed at, they lie. Later, they recall what they did and are curious to know what it is like to be "wasted." The peer pressure is not direct or typical, but rather subtle and displaced through the classroom. In learning "how the other class lives," interest is created on the desire to experience which overrules all sensibility. This is ironic since these programs, which are intended to warn teenagers about the dangers of drugs, in turn promote experimenting by those who have not already done so. This problem is very difficult to prevent since it is impossible to separate the "partiers" from the "non-partiers. One thing that the educators can do is to lessen the stereotyping by not assuming that every student takes drugs. In their discussions and statistics they need to leave room for the "straight" people. They are not as small of a population as they are believed to be.

Grads Make the Grade!

by Jennifer Balaban

Graduate: (n) to pass from one stage of experience, proficiency, or prestige, to a higher one. But what does this mean for EBHS seniors? Graduation forces seniors to carve out a life for themselves after high school. According to Mr. Navickas, one of the senior class guidance counselors, approximately 86% of the senior class opted to apply to college this year. The remaining estimated 14% will join the military, seek employment, or otherwise learn a trade.

The 86% who attend college can be divided into two categories: 20-25% will go to two year schools, and 60-65% will attend four year colleges.

Before reviewing the college acceptances of the EBHS seniors, it may be helpful to recognize the criteria involved in choosing a school that best suits one's needs. Preparation for college acceptance should not begin in the junior or senior year of high school. It is important to maintain consistency in studies of mathematics, science, social science, and foreign language, beginning with the freshman year of high school.

Colleges have recently put a stronger emphasis on the senior year of high school than in the past. Many admissions committees feel that a student who does not enroll in strenuous courses during the senior year, shows the tendency to maintain a light workload in college. This might reflect a deficiency in a student's attitude toward academics and looks less than favorable on a transcript.

When looking for a college, most students consider factors such as cost, distance from home, and friendliness of other students. Mr. Navickas advises that students "should visit the colleges to which they are interested in applying to in the summer after their junior year." From such a visit, a student will get a glimpse of campus life, academics, and the surrounding community.

In comparison to other high schools in New Jersey, East Brunswick has a fine track record for students gaining admission to the college of their choice. This year, approximately 75% of the students were accepted to their first choice schools. EBHS's fine reputation for academics is one of the prime reasons for the large number of college recruits coming to EBHS and making presentations about their colleges.

A number of seniors this year were accepted to some of the most prestigious schools in the country such as Harvard, MIT, Brown, Cornell, Columbia, Princeton, UC Berkely and Yale. Among the more popular schools which EBHS seniors will be attending in the fall are the University of Delaware, University of Maryland, Rutgers, University of Massachusetts, Penn State, Trenton State College and University of Wisconsin.

Overall, the highest concentration of acceptances was on the east coast, predominately in the states of New York, New Jersey, Delaware, Maryland and Massachusetts. A significant number of EBHS students will be attending college in the states of Florida, Arizona, Michigan, Wisconsin, Indiana and Ohio.

The statistics of our graduating class are impressive. Choosing a college is one of the most important decisions an individual can make. Consider the choices, visit the schools if possible, and best of luck in the future!

What's the Scoop?

by Katie Stapleton

Are you ever stuck, not knowing where to go after a long, hot day at the beach? Well, have no fear! I have the perfect solution: ICE CREAM. This summer, treat yourself and your friends to this sweet, scrumptious delicacy. You'll find that it is very refreshing after soaking the sun's rays all day. To make your choice easier, this reporter has even selected a few of the best ice cream parlors in this area for you to consider.

Perhaps you are interested in just a plain scoop or two of hard ice cream. Well then, **Baskin-Robbins**, located in the Woodbridge Shopping Center, is the place for you. They have the largest variety and the most original flavors that I have seen in this area.

Maybe you're in the mood to be creative. Try **Zipz** on Rt. 9. Here you get to go crazy and make your own sundae. Be careful, though, one tends to get carried away when so many toppings are available. You'll find that your eyes are bigger than your belly!

After a day of relaxing in the sun, maybe now you're ready for more action. I'm sure you've heard of **Farrell's** located in Brunswick Square Mall. Although it doesn't offer as large of a selection as these other ice cream parlors do, you'll have a ball with their noise (drum beating, piano playing, singing) and chaos. It's a great place for a party!

Looking for someplace modern, yet friendly? **Flavor Factory** in Mid-State Mall is a perfect selection. A colorful, happy atmosphere captures one's attention right away. Service is outstanding, and the employees, as well as the owner, are eager to assist you in choosing something from its original menu or even creating something new. **Flavor Factory** is a combination of the modern innovative machines and old-fashioned service and hospitality.

Another parlor that can't be overlooked is **Thomas Sweet's** found in both New Brunswick and Princeton. **Thomas Sweet's** has become a major attraction as people come from all over to try its well-known blend-ins, yogurts, and diet desserts, which are made fresh on the spot. There are often long lines, and the service may be slow. Don't let this discourage you, though, because it is well worth the wait and the little extra money.

Finally, I can't conclude without mentioning **Carvel**, which has been around since the early part of this century. Despite the simple setting, Carvel specializes in extraordinary soft ice cream (vanilla and chocolate) and fresh sundaes. In my opinion, no other ice cream parlor, modern or not, can compete with the fresh quality of Carvel's ice cream.

Now, it's your turn to choose. If it's from any one of these places, you won't be disappointed!

A Great Adventure in Physics

by Katie Stapletion

What is the maximum velocity on the steepest incline of Rolling Thunder? What is the period of revolution of the Buckoneer? What is the force of impact when two bumper cars collide? Only a physicist would think of these questions, as well as hundreds more, as he/she visits the rides at Six Flags Great Adventure.

It seems obvious, then, why EBHS physics classes accepted an invitation to participate in "Physics Day" at Great Adventure on Friday, May 8. While there, the EBHS students met other classes from around the tri-state region. Each student was given a 17-page packet of problems relating to the several rides around the park. They were responsible in attaining the necessary information needed to solve each problem. In many cases, this would prove to be a challenging and thought-provoking task; it would also be called an exciting experience.

Inside the classroom, physics may seem useless and tedious, but this expedition indicated to many that it is applied to innumeral situations. The students would finally be able to use their acquired knowledge in a practical and enjoyable way. While this trip served as a learning experience, it also gave the students the chance to relax and release their tension, for they are learning in an entertaining environment.

In addition, "Physics Day" was an influential advertising technique for Great Adventure. It should draw much publicity by sponsoring this event. At the same time, it invited the participants to return that same weekend-admission free.

Great Adventure was ready to host the upcoming event. Likewise, the students were ready to meet the mind-boggling problems that had been prepared especially for them.

Smokers Huff and Puff

by Dawn Agnese

At 8:51 A.M., on Friday, May 15, 1987, a number of students walked out of their second period classes as a protest to the new rule, scheduled to take effect July 1st.

Students were then asked to the Library to discuss the matter. Nicole Melillo, a junior here at the high school, says, "We went and nothing was solved. We asked questions and all we got was a changed subject."

According to the administrators, they're doing this because of the students' health. The students agree that smoking is bad for their health but ask, "What about the food in the cafeteria? It contains great deals of salt, grease, sugar, and fat!"

After failing to come to terms with the school, students were asked to go back to their classes. For those who did not go, their parents were called and were asked to take their child home. Most of the students that were taken home, soon returned, but behind the gates in back of the school. They hung signs declaring their rights under the "1st" and "14th" amendments. Also, these students took the liberty of naming the fence the "Berlin Wall" because no one who was protesting was allowed to enter school grounds.

When asked what their parents thought about being called, Jennifer Confer said, "They were upset at first but then they supported my belief that I should fight for my rights. People in a prison without any rights can smoke. There's something definitely wrong."

Students say they're willing to work half way. They would be very happy with a designated smoking area. They believe Principal Sheerin is overlooking some problems, such as smoking in bathrooms. Students think that they're being treated unfairly and say, "If we don't stand up for our rights, people will eventually step all over us." To them, the big question that remains is, "If this ban is allowed to happen, what's next? What else will they take away from us?"

Angelo Mutarelli, also a junior and an organizer of the protest states, "America is built on individualism; what the school apparently is trying to do is set a one way track of thinking!"

Get Ready...Get Set...Get Prepped!

by Suzie Tsalik
and Betty Ouyang

The SAT has been under a lot of heat for years. It has been claimed to be unfair towards minorities. Foreigners have accused it of presenting ethnic slants. Just recently, it has been announced that women are discriminated against in the SAT. Those that do not fit the above categories simply state that the SAT is not a fair test. Granted, anyone can complain, but there are three important facts:

1) The SAT has been administered every year without exception since April, 1941.

2) The majority of colleges in the country use the SAT as a necessary criterion in admission.

3) The people who did well on the SAT are probably not the ones complaining.

Let's examine the choices available in preparing for the SAT.

One of the most popular (and expensive) ways of studying for the SAT is through outside courses. The following are located in or near East Brunswick: Stanley Kaplan, Princeton Review, Sylvan Learning Center, and Huntington Associates*.

Stanley Kaplan, the man who "prepares more people for more tests than anyone else in the United States" has an SAT prep situated in the American Office Mall. The course costs $450 for eleven four-hour sessions. Diagnostic examinations (simulated SAT's) are offered and scores are reported on a four page computer analysis of strengths and weaknesses. Classes consist of about twenty students. Half of each lesson is devoted to math and half to verbal. Homework pamphlets are distributed every week. Teachers often stay after class to answer questions. In addition, the center has a test and tape lab which consists of 150 hours of SAT work. Here, students can take a diagnostic on any day the center is open. The purpose of this prep, as the brochure says, is to teach "the math and verbal skills needed not only for this exam, but for success at the college level itself." The course is a kind of coaching, a longer term instruction.

The Princeton Review is a $600, 36 hour (6 lessons, 4 diagnostics) course offered at the Temple B'nai Shalom (you don't have to be Jewish to take it). Classes are four hours each, split between math and verbal. Extra help workshops are available one day each week to review specific problems. In addition, teachers stay after class and often distribute their telephone numbers to provide more help. The four diagnostics are scored via computer and offer an analysis of strengths and weaknesses. Students are placed in classes based on their diagnostic exam scores. Class size ranges from 8-13 students. Princeton Review teachers are mostly students from Princeton University, so the atmosphere is light and laid back. What sets Princeton Review as one of the leadingmost SAT preps in existence? The College Board once said that the soundest preparation for the SAT is a lifetime of "intellectual challenge." Princeton Review realizes that few people are lifelong challenged intellectuals and cannot compensate in six short weeks. Therefore, Princeton Review has conducted extensive research on the SAT and its structure. They studied a myriad of past exams and traced many patterns. Their aim is to teach the SAT, not the material tested on the SAT.

The Sylvan Learning Center is a tutorial type class. Here, students attend the center and are tutored on a one-to-one basis (one student per class). The cost is $240 a month. Sessions are twice a week for one hour. Diagnostics are offered at a cost of $75, but they incorporate more skills than other diagnostics. What is this preparation trying to teach? Its aim is to improve math and verbal skills and make them long lasting. It preaches that the best technique for the SAT is experience. The SAT, however, is a test of aptitude. Aptitude is defined as inborn ability, a natural quickness to understand. Aptitude cannot be taught. The SAT can be taught. In trying to teach intelligence, Sylvan may be forfeiting its clients scores.

One other outside class is the Huntington Learning Center. Huntington's aim is to teach speed on the test (especially in math and reading composition). Instructors at Huntington explain, "This is not a remedial class, but for those who have already had a good deal of exposure to the SAT material." The idea is to make the student excel at what they are already proficient in, and to provide more exposure to the material and test. Pretty good idea; the cost is about $300 for six 4 hour sessions plus extra help.

Another alternative, though not one to be commended, is private tutoring. Tutors often cost up to $50 an hour and are usually no more than school teachers who understand the material but not the SAT. Problems on an SAT never appear twice. Knowing how to do each individual problem will not be favorable in the long run.

A much cheaper option is the SAT prep available through the Adult and Continuing Education Program. The cost is $40. Classes are one day a week split between one hour of math and one hour of verbal. Some bad points exist -- the class size is 25-30 students, making individual attention difficult; the preparation book, "Barron's", that is distributed has been under heavy criticism by many SAT experts; teachers actually are high school teachers, not SAT experts. The techniques are assigned as homework, and usually only specific problems are reviewed in class. The good points -- Gary Gruber's "Inside Strategies For The SAT", another book that is distributed, is highly commendable. Also, Adult and Continuing Education Preparation is better than no preparation.

If these courses seem a bit extravagant or superfluous for some, there is always the self-study option. Some books to consider:

"10 SATs by The College Board," "5 SATs by The College Board," "Gary Gruber's Inside Strategies for the SAT," "Princeton Review's Preparation for the SAT."

Some books to consider ignoring: "Barron's How to Prepare for the SAT," "Harcourt Brace's How to Prepare for the SAT," "Arco's Preparation for the College Entrance Exam SAT," "Monarch's Preparation for the SATs," and "Michael Donner's How to Beat the SAT".

The SAT is not a test of intelligence. It is a test of how well prepared you are. The information provided here will hopefully make those considering taking the SAT more aware of their options for preparation.

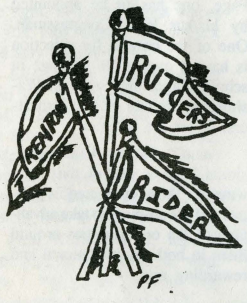
ACT'S and New Jersey: Perfect Together



by Allen Botnick

SAT, this is one of the most dreaded words in a college-bound student's vocabulary. The scores can make or break even the most dedicated and aspiring student. Traditiona'ly, this three-hour long examination has been a mandatory prerequisite for admission to New Jersey colleges and universities, but with the acceptance of the ACT assessment, or "ACT"; as an alternative to the SAT, student candidates may now choose which test these colleges will consider for admissions.

Unlike the SAT, the ACT consists of four tests: English, mathematics, social studies, and natural science. These tests are designed to measure a student's achievement, not aptitude, in specific subjects. The ACT test takes two hours and forty minutes and contains two hundred and nineteen questions. These achievement tests are not as specific as the Achievement tests given by the College Board; they measure general material learned in grades nine through eleven.

The ACT assessment is taken by over one million students each year. The test is well known in the West, Mid-West, and South. The ACT test is different from the SAT in that the ACT comes from the Western part of the country while the SAT comes from the East. Mr. Lippencott, a college counselor, stated, "The ACT has a Mid-Western nature and is a little more laid back than the SAT."

This easier approach taken by the ACT seems to have a positive effect on the students. "The SAT has a lot of controversy...the emotional costs to students are not worth it...You never hear a student coming out of a SAT saying it was a positive experience. Students end up worrying whether or not they were admitted to the right schools, causing them not to apply to some very fine schools," Mr. Lippencott continued, "because it doesn't have the high anxiety level associated with the SAT. Many students come out of the ACT feeling good about their performance."

The reason for the switch by the eight New Jersey colleges came from the needs of Mid-Western applicants. Dr. Venables from Rutgers University at Camden reported, "Students from the Mid-West weren't able to submit the SAT and were denied admission. By accepting the ACT, we could now enable a student who has not taken the SAT to compete equally in the Rutgers' admissions process."

When asked if one test was better than another, Mr. Lippencott said, "The best thing to do is to take both tests (the SAT and the ACT). It is to the student's benefit to have the best credentials possible."

Really Rad Recordings

by Adam C. Rosenberg

The latest effort to be put forth by the Santa Cruz California oddball group **Camper Van Beethoven** (self titled) is by far one of the freshest albums to be released in 1987. CVB, short for Camper Van Beethoven, is not a classical group, and will never be found in that section of the music store. CVB is not top 40 mainstream music or even album oriented radio (AOR) music; this is classified as hardcore or punk, more commonly referred to today as "college/underground music." This is CVB's third album, and **Camper Van Beethoven** covers just about every possible style of music that exists today. CVB is not for the weak hearted and should only be listed to if the listener has a very large sense of humor and can appreciate a good parody of music.

CVB, who sound nothing like the idolized group **U2**, **The Who** or any other from of music under the sun, opens the album with a strong, harmonious song called "Good Guys and Bad Guys." For a first time CVB listener, he would not expect this to be the style for a hardcore/underground group. In fact, the first few songs resemble folk, rockabilly music with a very warped view -- remember this band is not to be taken seriously. CVB in "Good Guys and Bay Guys" gives a song with a deep meaning about American patriotism, probably too deep for CVB. However, not to let the listener's humorous side down, CVB throws in "Just be glad you live here in America/ Just relax and be yourself/'Cause if you didn't live in America/ You'd probably live somewhere else." The next song "Jo Stalin's Cadillac" lists some political names (Stalin, LBJ, Somoza, Pinnochet) and could be a political statement, but it's just about driving around the neighborhood. Of course as the song ends, Krummenacher and Lowery (head groaners for CVB) are talking about "Gonna drive my Cadillac off a bridge/If I can find a bridge/Hey, has anyone seen the bridge?" By the sixth song, the album has swung into full force underground/hardcore music and it is a delight. "The History of Utah," which has nothing to do with the state, has Lowery rambling on about his friend who throws cinder blocks out of cars and who looks for flying saucers. CVB covers Pink Floyd's "Interstellar Overdrive" wonderfully, sounding very much like Floyd at its prime (as if Floyd was never at a prime). The Pink Floyd instrumentation does echo through Camper Van Beethoven but saying that CVB copies Floyd completely would discredit these fine, talented, humorous musicians. CVB does a cover of Led Zepplin's "Stairway to Heaven," however, because the title on CVB has a [sic], it is somewhat changed. CVB listeners need a sense of sarcasm to appreciate this outrageous piece because it sounds nothing like the original "Stairway to Heaven."

Speaking of rad ... David Bowie

Camper Van Beethoven has more raw energy than any overplayed, AOR band has today. They possess the ability to show that there is some future in the world of overplayed, overlistened to music. In addition, it has such a humorous, campy attitude to music that it is fun to listen to. CVB has a fresh new sound that anyone can listen to and love, as long as they do not take their music too seriously. After all, if Camper Van Beethoven wants to have a good time, the listener should too.

The man who is considered a god by some, has brought forth his newest and freshest effort in quite a few years. David Bowie's **Never Let Me Down** is an album filled with rich music from the thin white duke that range from powerhouse dance music, to bitter Bowie, to the fairy tale David Bowie world of the outer reaches of the universe. The album opens with the powerful buzz of "Day In Day Out." Songs like this and "New York's In Love" and "'87 and Cry" and the title track show that Bowie has retained all his "Let's Dance" plastic flair and can put together an album that moves. Bowie brings back styles from his other time periods on this album as perfectly as on, **"Scary Monsters"** and even mentions Ziggy Stardust in the intro of the song "Zeroes". "Zeroes" is not a re-write of "Heroes", but Bowie's view of what stardom and pop music is like, complete with imitation screaming crowds and the original Bowie formula. The Cyric Bowie of his **Low** to **Lodger** days appears in "Shining Star (Makin' My Love)" and tells his fans that good and bad come together, best expressed in the 'love line': "I could be your great misfortune/Well I could make you happy every goddamn single day of your life." The fairy tale Bowie returns from his "Aladian Sane" days on "Glass Spider." The song makes no sense but is a charming rock opera that is the centerpiece for his tour. The album's closer is a remake of Iggy Pop's (whose own album Blah-Blah-Blah is a masterpiece, and is produced and written by Bowie) "Bang Bang," by far the fullest, hippest Bowie song to date. This emphasizes the latest Bowie image of leather and guitars. "Bang Bang" comes straight from the Ziggy period and puts Bowie ahead of the other musicians today with a very casual "Wow" he mutters in the beginning. The menacing guitars and the black angel chorus make "Bang Bang" the best song on the album. Bowie has demonstrated his mastery of rock and roll here. Bowie is full of clean sounds on **Never Let Me Down**, and recaptures all of his energy he had during his earlier days and more than makes up for the flop **Tonight** was. David Bowie's latest effort has once again re-established that Bowie has all the intensity and power he ever had. Bowie has shown the music world that he is an icon not to be forgotten, and a musician to be highly respected.

A Revolution in Recording

Stephen Doniger

For those whose Bible is "Rolling Stone," or those who follow their music dearly, the time has come. Rock star Bryan Adams recently released his album "INTO THE FIRE" with the hit song "Heat of the Night." This in itself is indeed news to many people, but what's revolutionary about all this is that when the single for "Heat of the Night" was released, it was released as a "cassette single." This new form of single was put out by A&M Records Inc., (the same record company who put out "INTO THE FIRE"), and is the first of its kind. As with other cassettes, these singles are less easily damaged, more compact, and more easily transported, which are definite pluses for marketing.

The only problem faced by A&M regarding the sale of the new singles was the fear that sales would be lost because, unlike vinyls, the length of the songs on either side would affect the tape. If (as in the case of Bryan Adams), the two songs are of different lengths, ("Heat of the Night": 5:07/"Another Day";3:41), then there is disturbing blank tape at the end of one side of the cassette, and the single comes off sloppy. A&M remedied this by placing both songs on either side of the cassette; thus, the single comes off clean and even.

For those who prefer the traditional record, the singles are still readily available on vinyl. For those who would argue price, the "cassette single" is $1.99; which is the same as the vinyl, so that should not be a factor when deciding how you want your single. The singles are in relatively wide distribution and can be found in most fine record stores.

Look for more "cassette singles" to come, but for now, "Heat of the Night" is starting a trend which will hopefully be followed by other musicians. Just think, if this progression continues, we can look forward to DAT singles, and possibly even singles on disk. What a way to hear your favorite music!

Capitolist Page

by Andrew Kushnick

Here's an interesting way to spend your time in your late high school years. Anne Milgram, who attended East Brunswick High School last year as a sophomore, has been working as a Congressional Page in Washington, D.C., throughout her junior year.

There are three separate kinds of jobs that can be done by Congressional Pages. A page can oversee the desk at the floor of the House Chamber (of the House of Representatives in the Capitol building) and phone other pages to do certain chores for the Representatives. The second job involves working in the cloakroom in the Capitol building, answering phones, and taking messages for the Representatives. The third kind of a page is called a Running Page. He/she "runs" back and forth from one Representative's office to another's, acting as a messenger.

Anne's typical day starts with classes from 6:45 to 10:15 A.M. Then, she is off to the Capitol building to work as a Page when Congress is in session (usually from 12:00 noon to 5:00 p.m.). During mid-May, Anne was busy, along with the Congress, with the Iran-Contra hearings.

Anne admits that hard work, stress, and pressures are involved in such an important job, but she insists that it is worth it. She calls it "a rewarding experience," partly because she has the chance to meet so many people and experience so many things. She has met many influential Congressmen and celebrities who have visited Congress. Forced to room with people from all over the country, Anne has learned to live with others and "put up" with them.

To become a Congressional Page, one has to be appointed by his/her local Congressman. One of the criteria for selection is having over a 'B' average in school. Pages may work in Washington for one or two semesters, or for the summer.

Anne's job as a Congressional Page is one of the many ways for those interested in politics and government to take advantage of the opportunities around them in both an educational and rewarding way.

Brian Fox

Brian Fox

Goin' Bananas

by Michael Schoen

"Juggler, Entertainer" states the business card of Brian Fox. Brian Fox has the distinction of being one of the high school's few entrepreneurs. A sophomore, Brian runs an entertainment business, "Bananas," for young children. He entertains at the birthday parties of children from the ages of four to eleven. He juggles, rides a unicycle, juggles while riding a unicycle, and constructs balloon figures. He also incorporates gymnastics into his act, usually ending with a back-tuck, a back-flip in mid-air. He gets paid around $35 for a relatively short appearance. "I hang around for most of the party...the act itself is only about twenty minutes long."

The name "Bananas" has an interesting story behind it. After he had decided to start the business, Brian ordered a set of Indian clubs, the clubs which most jugglers are seen juggling. He ordered one blue, one red, and one yellow. When the order came, however, the clubs were all yellow. He decided not to return them. Later, he wanted a unicycle for Christmas (1986). He ordered a blue one. The store was unable to find a blue one for him, but if he wanted it, he could have the unicycle...in yellow. Brian said that he was "naturally color coordinated to be 'Bananas'." Another contributing fact to his name choice was that all his friends thought he was "bananas" for trying to start and run a business. Who's laughing at whom now, guys?

Brian had been thinking of starting the business since the summer of 1985. Since he was ten years old he had known how to juggle, and, two and a half years ago, he learned to ride the unicycle. But it was only last year that he began to utilize these talents. He had promised himself that he would begin in the middle of February, but he did not begin to distribute advertisement flyers until April 1, 1986. His first ads were printed on a computer and photocopied at his father's office. He then placed them in his neighbors' mailboxes, hoping that one of them would have a child with an upcoming birthday. Brian's first job, though, was in Monroe on April 19. One of the recipients of his ad had mentioned the flyer to a friend. The flyers did not go over too well after the first four jobs he got. In fact, it is likely that the only reason he was able to get those first four was that they were free of charge.

Brian realized that his business techniques had to improve greatly, and over the past year, they have. He now has his own business cards, which he gives out at the parties at which he entertains. The cards cost him $50 for a thousand. In addition, he puts advertisements in the "Sentinel." As most of his jobs are during the summer, he has put his ads in the paper in late spring. In 1986, his first ad was in the week of July 6, and this year, he started to advertise on April 17. The ad cost him $40 for a three line ad for eight weeks, a price which is made up for in only one or two jobs. As a result of these improvements, Brian's business has picked up. He now does a few jobs during the year, and many more over the summer. So, for all of you who aren't satisfied working for others, it is possible to follow Brian's lead and create your own business.

Searching for a Summer Job

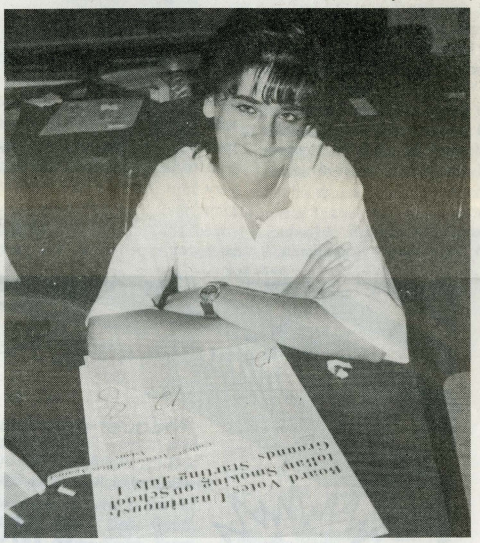
by Ron Lieberman

Have you been searching for a summer job? Is the pay barely acceptable, or the job hardly satisfying? The solution to your problems can be found at the Career Center.

One source of employment is the township itself, and the rate of pay for the township jobs vary from minimum wage to nine dollars an hour. The jobs include day camp counselors for the elementary schools and Camp Daisy, lifeguards and refreshment cashiers at the Community Beach, maintenance workers for the roads and parks, and clerks for the township offices. Another employment opportunity lies in food service; these jobs have a good rate of pay and are easy to obtain. Retail stores and offices are another possibility, but they usually prefer that the employee stay on throughout the school year. The United Parcel Service is a final possibility. The eight dollar an hour pay for five hour shifts makes it an excellent choice for the senior just out of high school, but the employee must be eighteen years old.

Students can also go elsewhere in New Jersey to find a job. Various camps have minimal pay, but offer a rewarding experience in which the students get to build a relationship with younger children. Many beaches need lifeguards. Great Adventure, with its five dollars/hour wage, is also attractive. In addition, many students overlook the jobs in the rest areas of the Turnpike.

For more information on these jobs and others, contact Mr. Sullivan in the Career Center. All that you have to do is fill out a summer registration card, and the staff of the Career Center will help you from there. The search is over; a summer job awaits you.



Julie Meyers

EBHS Finds Summer in France

by Diana Tsaliovich

Parlez-vous francais? At least two juniors at EBHS do. This summer, Julie Meyers and Andy Darien, both fourth year French students, will be spending the summer in France.

Julie will be going on a scholarship program sponsored by the corporation at which her father works. The trip will be an educational as well as an enjoyable experience because she would like to "pursue a career in foreign relations." In France, Julie will live with a French family. "I don't know who they are or where they'll be" she says and this is why she is "kind of scared. I won't know anyone there," she says, "but it's a good experience for me. Hopefully, I can work because I don't think I'll have school (for French)." Julie will spend two months with her host family.

Andy will stay in France for a slightly shorter period of time -6 weeks. Even though he knows nothing about his host family either, he is "not nervous about going." In fact, he is looking forward to it. "I've been taking French for so many years," he says, "that I want to put it to some use. [Besides,] you can't learn about the culture and the people through books." During the first four weeks, Andy will learn about the French and their language through "total submersion. I'm not supposed to talk to anyone I know." The final two weeks, however, Andy will travel around the country with a group of 5 to 10 people, "all from Experiment in International Living."

If you are interested in learning more about living abroad, contact a foreign language teacher.

An American In Moscow

by Adam C. Rosenberg

The mere thought of travelling to the Soviet Union for some people would be unthinkable. However, for Barat Dickman, a sophomore at East Brunswick High School, the unthinkable became a rewarding and enriching experience. Through the Trenton Sister City Youth Orchestra, Barat and 34 other orchestra students from across New Jersey got the chance to travel to the Soviet Union as part of a cultural exchange program. The purpose of the trip was to expand the cultural horizons of the superpowers and to forget about the political differences between the United States and the Soviet Union, at least for one week. American teenagers were to interact with Soviet teenagers.

After an audition, twelve rehearsals, and a concert in New Jersey, Barat, along with the rest of the orchestra, eight chaparones, and conductor Judy Morse, left for the Soviet Union on March 30th. The group landed in Moscow and met Russian teenagers whom Barat described as "very much like us." The two groups toured during the day and the Trenton Youth Orchestra performed at night at Moscow University. The musical selections they played as part of the concert were Handel's "Water Music," "Autumn," "Introduction to Rhondo Capriciosso," and Gershwin's "Rhapsody in Blue." According to Barat, "The Russians enjoyed all the music; however, they especially loved Rhapsody in Blue. Classical music is international, and everybody

Barat Dickman

loves the same sounds."

Besides performing for the Soviet Union, the orchestra members spent a great deal of time with their Russian friends. Barat traded blue jeans and chewing gum with the teenagers and was very surprised that they did not know how to chew gum. Barat stated, "That was one of the strangest experiences. We gave them the gum, they chewed it for about a minute and then swallowed it,thinking that was the thing to do."

Further describing his Russian friends, Barat said, "The Soviet teenagers were very happy where they lived and were extremely hospitable, more than you see in the United States sometimes. The Soviets also did not have a bad view of the United States like we have of Russia."

According to Barat, Moscow is like any other city in the world, but he noticed it did have very clean subways, underground walkways, and giant movie screens outside to show advertisements. One thing Barat missed, though, is fast food. Hamburgers are non-existent in Russia. Rock music has not really reached the Soviet Union yet. Barat said that the Soviets can only get music like U2 or The Police through underground dealers.

In Barat's opinion, the trip was "an amazing experience and a definite success." If the cultural program continues, the Trenton Sister City Youth Orchestra will host the Soviet Union's youth orchestra next year in the United States. Exchange programs like the Trenton Sister City Youth Orchestra, with people like Barat Dickman, are the first step to ensure world peace in the years to come.

A Virtuoso At Work

by Michelle Harnick

Until seven years ago, teachers' achievements were unnoticed and not praised, but this sorry state of affairs has now been corrected by The Governor's Award in Art Education. This award recognizes the outstanding art achievements of teachers as well as students in New Jersey. This year, Elliot Taubenslaug, the drama teacher, who has been with the East Brunswick High School drama program since 1959, will receive this distinguished award at the New Jersey State Museum on June 2. In order to qualify for this award, one must excel in his profession of teaching drama.

In the early 1950s, Mr. Taubenslag pursued a career as a professional actor, where he worked with Lucille Ball and other well known actors and actresses. Deciding to contribute some of his knowledge of acting to youngsters, he began teaching the skills one must possess to become an actor. When East Brunswick High School first opened in 1959, he worked as a speech and drama teacher. Within the school, he vicariously experienced success through his students who have won numerous awards for their performances. At Middlesex County College, on May 5, the drama students won four awards for the play "Godspell", and on May 19, they will be in another competition where they will put on two plays, "Godspell" and "The Good Earth," the latter being directed by Danny Simon, one of Mr. Taubenslag's best students. Besides the plays which Mr. Taubenslag is producing within the school, he is also affiliated with several playhouses. He is President of Playhouse 22 and runs the Jan Hus Playhouse along with his son Michael, who also runs a children's theatre in New York. Because of his great talents in drama, he is affiliated with workshops in New Jersey and New York, where he shows other teachers the techniques which he uses to teach his students. He has also been nominated President of Speech and Theatre Association of New Jersey.

It is easy to see Mr. Taubenslag's wide range of talents which qualify him to receive the Governor's Award in Art Education, one of the greatest honors given by the state.

Sunburn Safety

by Andrew S. Hua

This summer, most people will probably be hitting the beaches, the pools, and tanning in the sun. The sun's rays, the pool's chlorine, and the ocean's salt are three of the most damaging elements to the hair and skin. Chlorine damaged hair loses its luster and changes its color, becoming dry and frizzy. Darker hair turns reddish-yellowish, while lighter hair turns greenish. It is important to wash, and not just rinse the hair after swimming. Petroleum jelly in the hair is a great protection for hair against the damaging effects of chlorine and salt water. While sunning, either wear a hat or use a strong oil-based sunscreen.

While sunning, one should avoid sunburn by using an adequate sunscreen. Make sure to protect the face, hands, and neck more than the rest of the body. Protect the lips with a lip balm. To avoid burning, reapply sunscreen often. Although some sunscreens claim they are waterproof, they will wear off in the water, so reapply them after coming out of the water. When possible, one should wear a hat, and wraparound sunglasses that protect the eyes from the sun's ultraviolet rays. To remedy dry skin, use moisturizers to replace lost moisture. Finally, one can make a tan last longer by waiting at least an hour after tanning, before showering, or bathing.

The Year In Sports ...

by Andrew Javorsky and Rob Olan

The year in sports: The football team terminates J.P. Steven's 18 game winning streak on Halloween Night.....Dave Lee sets course record and personal best at Holmdel-16:31.....The Bears soccer team once again takes the GMC title.....Greg Berliner scores 1000th point against St. Mary's.....Winter Track team goes undefeated.....Boys Swim team qualifies for state swim-offs.....

The first two team to continue the winning tradition at EBHS were Coach Hayston's soccer Bears and Coach Borden's football Bears. The soccer team, led by senior captain Hani Henein, completed its second consecutive 20 win season and captured both the divisional and the Conference crown. When Coach Hayston was questioned about the team's overall success he answered, "On the whole we were successful but we still haven't reached the ultimate goal of a state title. However, we have a bright future and next year promises to be the Year of the Program."

Over on Jay Doyle Field, under the leadership of Coach Borden, the boys football team posted a 6-2-1 record enroute to the Red Division Championship. Reflecting on next year's squad, Coach Borden stated "There is a promising future to look forward to as 15 starters will be back in the lineup."

Coach Brophy and his fine cross country team ran away this year with a most impressive 7-2 record as they finished the season with a second place finish in the conference. This determined bunch was led by senior Dave Lee. Coach Brophy spoke of this superb athlete by simply saying "He is the best runner this school has ever had."

As the fall season drew to a close, the winter season was only beginning. As most teams went indoors, the die-hard runners on the Winter Track team stayed outside and ran against the sub-freezing temperatures. This proved to be worthwhile as the team went undefeated throughout the season. In addition, the team won the county relays and the county team title. Under team title, the individual winners were Steve Cohn in the quarter-mile, Brian Convery in the half-mile, and Dave Lee in both the one and two mile events.

This year's wrestling team, though plagued by injuries, still managed to win the divisional title and send several individuals to the state tournament. The most successful individual was Glenn Clearie in the 170 lb. weight class. He made it to the third round in the tournament and lost to the guy who went on to win the states.

The last and most successful group of the winter was Coach Nopp and the basketball team. The team mounted an impressive 25-3 record while capturing the GMC and Red Division title. The teamleader this season had to be senior center Greg Berliner. Berliner scored his 1000th point against St. Mary's and was selected as a 2nd Team, all groups, all state player. Coach Noppenberger made a simple statement about this season. He called it "The best ever!"

The 1986-1987 school year was extremely successful and it continued the already established EBHS winning tradition.

Senior Variety Show 1987

by Stephanie Newman

From the very beginning when thirty seniors walked across the stage spelling out the start of the Senior-Variety Show to the very end when all the performers sang "Best of Times" in unison, the show was non-stop entertainment. It left the audience laughing in their seats from skit to skit. Also adding to the enjoyment of the crowd were the Masters of Ceremonies: Sue Hunter, Mike Kinnear, David Leviton, Doug Osowski, and Dan Simon. They never ran out of funny ways to introduce acts; they kept everyone laughing. Their best act was their entrance when Marnie Weinstein, the director of the show, explained to the audience that she ordered emcees from Atlantic City who never showed up. As she was apologizing for their absence, a delivery man interrupted her and brought in five large sacks with people in them. As Marnie introduced the emcees, they stepped out of their sacks. Then they acted as if they were having great difficulty reading their lines off of cue cards held by Stacey Winter. Skits like these added extra amusement to the show.

Some favorites were "Church Lady," "Can't Help Falling in Love,""Fight for Your Right to Park," and "Kung-Foo Theater." "Church Lady" featured Jeff Goodman playing the popular character from "Saturday Light Live" and Brian Kaplan. Church Lady was auditioning skits for the variety show, but couldn't find any she liked. She charged each performer with worshipping Satan and repeatedly delivered her infamous line: "Well, isn't that special." David Harnick, who danced around the stage wearing tights, was particularly humorous. "Can't Help Falling in Love" starred Bonnie Schaffhauser ballet dancing gracefully on her toes. She demonstrated difficult steps, making them appear easy. "Fight for Your Right to Park" was a hysterical take-off of the Beastie Boys' song: "Fight for Your Right to Party." This skit was performed by Brian Kaplan, Darren Kimball, Bob Lach, and Dan Simon singing about the juniors driving to school. The words were hilarious, and the way the boys danced completely mimicked the real performers of the original song. "Kung-Foo Theater," featuring Darren Kimball, Gary Lieberman, and Dan Lonski, was a take-off of the kung-fu movies on television. In the skit, a tape was played of their dialogue in English, but the performers pretended to be speaking Chinese while the tape was playing. In the middle of one of their fights, the three actors started dancing around, because the sound of them hitting each other sounded like breakdancing music instead of punches.

The many other comical acts included the slapstick comedy of "Smith and Jones," the singing and dancing raisins of "Lunchbox," the monologue of Michael Pacholek in "Homecoming 2036," the amusing enactment of the IPLE class in "The Real IPLE," and the original humor of "Take Off, Eh." Also in the show were the entertaining take-offs of songs, such as "Hot for Sophomores," "Twelve Years of School," "School's Out," "Seniors at E.B. High," "Our Favorite Things," "Sunrisers and Sunsetters," "California Seniors," "Run G.S.C.," and "Rumors."

The Senior-Variety Show not only displayed the comedy skills of the seniors; it also illustrated their performing talents. Three girls demonstrated their singing skills: Christie Choida sang "Out Here On My Own," Jayme Bilgor sang "Don't Cry Out Loud," and Geffen Sagee sang "The Rose" accompanied on piano by Nick Caparossi. Several seniors showed the audience how well they can dance in two extremely different types of dance. Kathleen Duffy danced incredibly well to the fast beat of "Twist My Arm," and the Corps Dancers displayed great precision in their multiple performances. Bernadette Appleby performed an ethnic dance extremely well to "Sailor's Hornpipe."

The show ended with a slide show of the seniors and the song "Best of Times" performed by all the participants of the show, the officers, and the stage crew, featuring many soloists. The Senior-Variety Show was a night to remember. The many acts were amusing, entertaining; giving the seniors a chance to display their talents (while putting down sophomores and juniors!).

A DAY IN THE LIFE
GRADUATION
In honor of our graduating seniors, Brett would like to say a few words.
OH NO! He's going to talk about football, I'm sure of it.
Today I'd like to discuss Green and White.
Hey, he's showing some school spirit, he's finally not talking about football.
Mean Joe Greene and Randy White were two of the greatest defensive players...
